

CORE**Tactical Thinking: Mind Over Body**

111-0001

Tactical thinking drills provide officers a safe opportunity to think critically through scenarios and develop experiences to draw from when facing a real-life situation. This course, the first in a seven-part series, discusses tactical thinking, decision-making processes during a threat, and the natural response of the officer's mind and body during stress. The mental phenomenon of tunnel vision is also highlighted to further emphasize the importance of ongoing training.

**Communications: TTY: Call Recognition and Processing**

405-0505

Most calls into a dispatch center will come from people using a standard telephone to verbally report an emergency, but in some cases, a dispatcher will hear tones instead of words. This usually indicates that the caller is using a TTY—or text telephone—because he or she is unable to speak. Federal mandates and your desire to help people in need make it critical for you to know how to properly answer these calls. This program explains some of the different devices used and how to properly communicate with TTY users in need of emergency help.

SUPPORT**Calibre Presents Roll Call: Confronting the Suicide Bomber: Determining Agency Policy**

057-0106

Suicide bombers have a history dating back to the early 1980s with well-known attacks in the Middle East. United States government officials speculate it is only a matter of time before suicide bombers attack on American soil. Are you prepared to identify a suicide bomber? Are you clear on your agency's policies and procedures for handling such a suspect? This course explores the history of suicide bombers, including their reasons for volunteering and their typical methods used to carry out missions. Discussion also covers the "shoot

in the head" policy put forth by International Association of Chiefs of Police and the subsequent debate on how local agencies should define their policies and procedures.

**HazMat Awareness, Part 5 of 8: Basics of Material Safety Data Sheets and Hazardous Materials**

162-0205

This course provides basic information about material safety data sheets (MSDS) and shipping papers that indicate hazardous materials and highlights possible criminal or terrorist activities involving chemical and biological agents. In addition, limitations of using the senses in determining the presence or absence of hazardous materials are given, and first responders are shown how to identify the hazardous material(s) in each situation by name, UN/NA identification number, or placard.

**Calibre Presents Roll Call: Officer Ambushed: The Mark Sawyers Incident**

057-0105

Uniformed and identifiable law enforcement officers run the risk of being ambushed on a daily basis. Sterling Heights, Mich., police officer Mark Sawyers is a prime example. Officer Sawyers was murdered in an unprovoked ambush while sitting in his patrol car filling out paperwork because his killer wanted the officer's service weapon to commit a bank robbery. This presentation shows you actions to take to keep from becoming an easy ambush target in this enlightening presentation.

**Identity Crimes, Part 1 of 2: The Victim**

160-0105

Identity theft is the fastest growing crime in America according to the Federal Trade Commission. A survey conducted by the FTC in 2003 disclosed 9.9 million victims, costing them \$5 billion. Identity theft is not a distinct crime problem; identify theft is a component of many types of crimes. In today's information-driven world, criminals have an unlimited number of tools that allow them access to personal information. Part one of this two-part series looks at the victim: how one

becomes a victim, what the victim must do for damage control, and the steps that individuals can take to lessen the odds of becoming a victim. Part two addresses the role of investigators and discusses the roles of federal agencies to assist local law enforcement.

**Calibre Presents: Roll Call: Body Armor: Protecting the Protectors**

057-4002

You know you should wear your body armor every day for the protection it offers. This program introduces you to an officer whose body armor saved him from a projectile of unbelievable proportions. Deputy Frank Hernandez is alive today only because his protective vest deflected the object away from his vital organs. This is an inspiring tale of survival that you will never forget.

**Tactical Patrol: Pursuit Phases and Technologies**

163-0013

This course covers two pertinent topics of vehicle pursuit. First, the phases of a pursuit will be discussed along with the activities and decisions that occur during each phase. Second, since the goal of each pursuit is safely stopping the fleeing vehicle, current and potential vehicle-stopping technologies will be examined.
