Tested	SHOW TITLE	SHOW #	LENGTH	SYNOPSIS
A+	NEW Understanding Hate Crimes	111-0110	30 minute video plus course materials	This course is designed to provide police officers with an overview of hate crimes and extremism in the United States, with emphasis on identifying hallmarks of extremism and reacting appropriately to the commission of a hate crime.
A+	Interview and Interrogation, Part 3 of 4: Adults v. Juveniles	160-0805	30 minute video plus course materials	Interviewing and interrogating a juvenile requires special considerations. There are legal requirements that must be observed as well as specific techniques that will help you get the most information from your suspect. This course looks at how you can effectively interview and interrogate a juvenile while staying within the boundaries of the law
A+	Med Aid: Autistic Patients/First Responders and Joint Injuries	040-0009	30 minute video plus course materials	This special course deals with special medical issues for first responding police officers. Originally designed for emergency medical technicians, this training is important for anyone who may have to work with a trauma victim until medical personnel arrive. This course looks at persons with autism and how you may interact with them. It also reviews one of the top occupationally acquired injuries for first responders: joint injuries
A+	Medical Detectives: Rope Analysis	184-0125	30 minute video plus course materials	Who was the sexual offender that murdered two adolescent boys in Nebraska? The key was the "junk rope" he used to tie his victims – rope made of odd scraps and mill sweepings. In this course, the police and the FBI use rope analysis, psychological profiling, forensic odontology, and even hypnosis to narrow their search to John Joubert, bringing a 116-day manhunt to a close. But the trial did not end there; the junk rope also tied him to a previous murder in Maine.
A+	Commercial Vehicle Searches	057-0307	30 minute video plus course materials	Drug smugglers are constantly adapting their methods in order to evade police detection. This course examines the tools and methods currently being used to search commercial vehicles. We identify common contraband concealment containers and identifiers of drug courier vehicles as well as the challenges of searching large commercial vehicles.
A+	Physiokinetics and Time Framing	057-1207	30 minute video plus course materials	Physiokinetics is what makes the human body function, specifically in terms of power, balance, and mobility. If we understand what makes people have power in their movements, the ability to keep their balance, and how they use mobility, we can affect their power, balance, and mobility while resisting arrest or actively fighting. The concept of time framing is for every "piece" of time officers have, offenders have an equal "piece" of time. Understanding time framing facilitates the officer creating positive time frames while causing the offender to waste or have negative time frames.
A+	No Regard for Human Life, Part 1: The Trooper Stone Shooting	057-1006	30 minute video plus course materials	This course, part one of a two-part series, looks at the dramatic events that unfolded in Tyler, Texas, where a Texas State Trooper was gunned down on a traffic stop, and a rolling gun battle with automatic rifle fire ensued. Trooper Steve Stone takes us through the events of that night and how he survived being shot point blank in the chest. In part two, we ride with the Tyler police officers who pursued the gunmen through the streets of their city even in the face of withering high-powered rifle fire
A+	Motor Vehicle Theft, Part 2: Identifying the Stolen Vehicle	888-0243	30 minute video plus course materials	By taking one additional step, patrol investigators can uncover otherwise concealed activity in vehicle theft. Knowing where VINs are located and how to match them to one another allows officers to validate the vehicle's identity. Do you know what to do when they do not match? Join us as we learn the ins and outs of vehicle theft from a seasoned investigator.
A+	Less-Lethal Force, Part 2: Impact Projectiles	163-0018	30 minute video plus course materials	Officers face an ever-increasing number of challenging situations, including those involving armed, non-assaultive, and non-compliant subjects. Impact projectiles are often deployed in such cases, and they have generally been proven safe and effective when properly used by trained personnel. This course addresses the contemporary use of 12-gauge impact projectiles.
A+	Traffic Stops and Racial Profiling: Police-Citizen Contact	111-0010	30 minute video plus course materials	Traffic stops are among the most common interactions between the public and the police. Unfair and illegal practices such as discriminatory profiling can have a major negative impact on the public perception of law enforcement. This series of courses will examine the practice of racial profiling as it relates to traffic stops. Part one of six discusses the real and perceived problems facing minorities who are affected by discriminatory profiling during traffic stops. The three levels of police-citizen contact are identified, as well as the principles that govern stop and frisk procedures. Constitutional and case laws that impact traffic stops are also reviewed.
