

CORE**Calibre Presents Roll Call: Police Use of Force, Part 1**

057-0406

This program is the first in a three-part series that explores police use of force. Part one identifies three areas that impact police use of force and the current issues to consider when developing use of force policies. In addition, appropriate training and investigation techniques targeted at use of force procedures are discussed.

**Tactical Thinking: Approaches on Foot**

111-0004

Tactical thinking education and drills provide officers a safe environment in which to think critically through scenarios. Practicing tactical thinking is essential to officer safety and provides experiences for the officer to draw upon during a real-life situation. This program discusses tactical thinking strategies and relates them to approaching suspects on foot. An officer's approach toward a suspect must always be carried out carefully — with full awareness of surroundings, availability of cover, and a thorough and quick assessment of the danger presented by the suspect.

SUPPORT**HazMat Awareness, Part 7 of 8: Emergency Response Guidebook**

162-0207

This course, part seven of an eight-part series, discusses information available from the current U.S. Department of Transportation Emergency Response Guidebook, Material Safety Data Sheets, and product labels. The course describes how to identify hazardous materials and initiate the proper safety actions to protect life, property, and the environment. Also outlined are techniques used to isolate a hazardous area and deny entry to unauthorized persons, as well as how to identify and implement initial notification procedures for hazardous materials incidents at fixed facilities and transportation accidents according to local standard operating procedures and the local emergency response plan.

**Calibre Presents Roll Call: Simulations and Marking Cartridge Safety**

057-0405

There may come a time when your agency will utilize one of the many firearms simulations or marking cartridge products on the market. These systems involve simulated actions and violence as well as the use of real, but modified, firearms; therefore, detailed safety guidelines must be established and followed. This Roll Call course highlights procedures for safe operation.

**Special Interest Aliens**

164-0405

Since September 11, 2001, every officer in the country has been on alert for the next terrorist attack. Determining who is a potential threat is no easy task. Knowing what to look for and what to ask is crucial for every officer on the street. This program, in conjunction with the U.S. Department of Immigration and Customs Enforcement, will show investigative techniques to law enforcement officers that will help you determine if an alien from a special interest country potentially poses a terrorist threat to the United States.

**Poison Exposure Hazards**

040-0010

Originally created for EMS first responders, PULSE training modules can help prepare you for instances when you arrive first to a medical scene. In the air, on the ground, at work or at home, everywhere we turn there are possible poison exposure hazards. In this episode of PULSE/Emergency Medical Update, we examine the differences between toxic and non-toxic substances and look at the benefits of utilizing poison control centers.

**Calibre Presents Roll Call: Officer Down, Part 1 of 2**

057-4007

It is the most hated call of all. When this call comes in the entire department goes into "condition red." Well look at officer down from the point of view of an officer gunned down during a "routine" traffic stop. His immediate reactions and his will to live made the difference. He kept telling himself: "I will survive, I will survive!" He did, and we'll tell you about it in this compelling program.

**Sex Crimes, Part 1 of 2: Child Pornography**

164-0102

In part two of our series on sex crimes, LETN explores the nature and dynamics of child molestation and exploitation. This program takes you for ride with the U.S. Immigration and Customs Enforcement and the Fort Worth, Texas, Police Department, as they share how their agencies are successfully prosecuting sex offenders. Our presentation also reviews the dynamics of these offenses and explores the tactics used by the offenders in order to enlighten the viewer about the nature of these types of crimes.

**Special Encore Presentation
Lessons Learned in the Health and Public Safety
Sectors Related to the Recent Gulf Coast Hurricanes**

300-0469

Recent hurricanes in this country put a major stress on emergency responders but these experiences have taught them many valuable lessons. The purpose of this 2-hour session is to review how lessons learned from these disasters can improve disaster planning for hospitals, public health, fire departments, emergency medical services, and law enforcement agencies. This program was previously recorded and will not be included in the monthly product mailing or on PRIMEnet. No written materials are associated with this program.
