| Tested | SHOW TITLE | SHOW # | LENGTH | SYNOPSIS |
|-----------|--|----------|---------------------------------------|--|
| A+ | Identity Crime, Part 2: Investigating | 160-0205 | 30 minute video plus course materials | Identity theft is the fastest growing crime in America according to the Federal Trade Commission. In 2003 alone, more than 9.9 million Americans were victims of identity theft. Because of the broad range of crimes facilitated by identity theft and the pervasiveness of the problem, the federal government has enacted laws that establish what constitutes identity theft, created a central clearinghouse to assist victims and law enforcement at all levels, and redefined the meaning of the term "victim." This course looks at the role of the investigator and the federal resources available to assist in the investigation. |
| A+ | Large Vehicle Bombs: Post-Blast Investigation, Part 2 | 162-0002 | 30 minute video plus course materials | We return to the FBI's Large Vehicle Explosive Device Post Blast Investigators training at Fallon Naval Air Station in Nevada. Students there are learning to investigate a large vehicle explosion like the one that destroyed the Alfred Murrah Federal Building in Oklahoma City, where 168 people were killed. We examine the approach to the scene and conducting the preliminary survey, as well as potential crime scene hazards and the need for universal precautions |
| A+ | Juvenile Corrections | 111-0107 | 30 minute video plus course materials | This course discusses how and why juvenile offenders develop differently than non-offenders, how corrections officers can better supervise juvenile offenders, and techniques for dealing with violent juvenile offenders. The course further covers detection and prevention of juvenile offender suicide attempts and looks at programs available to help juvenile offenders reintegrate into society after release from the detention facility. |
| A+ | Medical Detectives: Munchausen Syndrome by Proxy | 184-0118 | 30 minute video plus course materials | When the baby daughter of Jim and Tanya Reid developed sleep apnea and then died, doctors declared the tragedy a case of sudden infant death syndrome. But when the Reid's young son developed the same symptoms, a suspicious healthcare worker suggested Munchausen syndrome by proxy. When pathologists reevaluate the autopsy records of the deceased daughter, the result is one charge of felony child endangerment ... and one charge of murder. |
| A+ | Tactical Thinking: Mind Over Body | 111-0001 | 30 minute video plus course materials | Tactical thinking drills provide officers a safe opportunity to think critically through scenarios and develop experiences to draw from when facing a real-life situation. This course, the first in a seven-part series, discusses tactical thinking, decision-making processes during a threat, and the natural response of the officer's mind and body during stress. The mental phenomenon of tunnel vision is also highlighted to further emphasize the importance of ongoing training. |
| A+ | Policing Extremists | 111-0307 | 30 minute video plus course materials | On a daily basis, law enforcement officers come in contact with members of extremist groups. Most of the time, these encounters are ended without incident. However, when an extremist chooses to create a conflict with law enforcement, it can lead to violence, serious injury, and in some cases, death to the officer. In some cases, the extremists encountered by law enforcement may be bent upon committing acts of domestic terrorism. This course will discuss the correlation between extremism and domestic terrorism and what dangers are present for law enforcement officers each time they deal with a member of an extremist group. Additionally, identification of members of an extremist group as well as how to diffuse potentially violent confrontations with them will also be presented. |
| A+ | Conducting Traffic Stops, Part 1 | 163-0002 | 30 minute video plus course materials | This course provides information on what can be expected during a traffic stop. Emphasis is placed on how to detect criminal activity, current legal issues, and the broad importance of traffic stops as a function of law enforcement. |
| A+ | Wilderness Series, Part 1: Patrolling Techniques | 179-0152 | 30 minute video plus course materials | This course explores tactical movement as it relates to closing with suspects or objective sites in various types of terrain other than urban environments |
| A+ | Roll Call: Pre-Attack Behavioral Indicators | 057-4010 | 30 minute video plus course materials | Have you ever been on a call when "gut instinct" told you that an assault was about to occur, and sure enough, it did? That feeling was not created out of thin air; you subconsciously recognized "pre-incident indicators" the subject was giving off just before he or she attacked you. This course shows you how to recognize indicators that an assault is about to occur so you can plan options and strategies for defense. |
| A+ | Tools for Intelligence and Crime Analysis | 161-0003 | 30 minute video plus course materials | This course discusses the tools and techniques commonly observed in intelligence and crime analysis. An emphasis is placed on understanding the intelligence and crime analysis process through the application of various techniques. Each technique is described in detail. |
| A+ | Empowering Patrol: Rapid Response to Active Shooter Incidents | 179-0158 | 30 minute video plus course materials | This course explains how a change in philosophy about how law enforcement employs a rapid response to active shooter incidents will decrease deaths, injuries, and public criticism. Join us for an overview of the tactics used in such incidents. |
