Calibre Presents Roll Call: Behaviors That Could Cost You Your Life

057-0906

Every day, police officers die in the line of duty. These incidents happen during crime incidents as well as during routine activities such as traffic stops, training and physical conditioning. This course identifies the most common of these incidents and outlines prevention techniques that can be employed to keep officers more safe on the job.

September 11th—Five Years Later

111-0906

Five years after 9/11, the law enforcement community has made great strides in how it prepares and responds to terrorist attacks. Join us for an informative discussion of how the major areas of command and control, planning and training have changed as a result of the attacks. Consideration is also given to what still needs to be done to prepare law enforcement for the possibility of another attack.

Calibre Presents Roll Call: Booby Traps

057-0905

The drug dealer wants to protect his drug lab against other drug dealers and against you. He'll rig it with devices that can seriously injure or kill the unwary. Booby traps have long been employed by human beings to protect their turf. Police officers need to have a general understanding of how booby traps are designed and employed so they can be aware and defend against them.

SUPPORT

Infectious Diseases

070-0605

If you were first to arrive at a medical scene, would you be prepared to give first aid? This series was designed to provide you with a basic understanding of medical conditions and procedures you may encounter in the field. This course discusses infectious diseases, learning how to

recognize the threat, when and how to use barrier protection, and what to do if you think you've been infected.

CSI: Cartridge Case Ejection Pattern Testing

160-0013

This course presents techniques for carrying out cartridge case ejection pattern testing on weapons that eject fired cartridges/shot shells in order to establish shooter location in a shooting incident. There are a number of considerations involved in carrying out this type of testing.

Cop Talk—Officer Sign Language

057-4012

There are times when officers on the street need to communicate with each other without those around them knowing what they are saying. It could be just a noisy environment that makes talking impossible, or it could be relaying information to each other about a dangerous subject. Talking Hands is a system that allows officers to communicate nonverbally using hand signals. Talking Hands is based upon the same signs used by the hearing impaired but tailored to the police world.

Emergency Preparedness and WMD: Large-Vehicle Bomb Post-Blast Investigation, Part 1

162-0001

This course is the first in a multi-part series on investigating large vehicle explosive devices such as those used in Oklahoma City in 1995 and the World Trade Center bombing in 1993. To set the training stage, we visit the FBI's Post Blast Investigation School that was held at Fallon Naval Air Station in Nevada. Part 1 starts with an introduction to crime scene management. This course examines the advantages and limitations of forensic science, search warrant requirements, crime scene sketching, and preserving crime scene integrity. Future programs will deal with the preliminary survey, crime scene behavior, proper packaging of evidence, and crime scene documentation.

Tactical Patrol: Vehicle Search, Part 1 of 2

163-0006

This lesson is the first of a two-part series on vehicle searches. Part 1 focuses on three types of vehicle searches: frisk, search incident to arrest, and consent. For each type of search discussed, the legal requirements of the search as well as the permissible scope of the search will be discussed. In Part 2, other types of vehicle searches will be discussed including plain-view seizures, motor vehicle inventory searches, and motor vehicle searches based on probable cause.

HOMELAND SECURITY

Homeland One Awareness Level Training: Principles and Features of the ICS

947-1002

This Homeland One activity weds incident command concepts to effective strategies regarding terrorism response. Even those who already know the Incident Command System will be compelled to rethink their roles in terrorism preparedness.

Homeland One: CIP—Applying Countermeasures, Part 1 of 2

947-1016

The fifth and final step of the CIP process, application of countermeasures, is designed to reduce or prevent the degradation or loss of an asset due to an identified threat. Within the emergency services sector, countermeasures are typically applied to personnel, physical assets and both cyber and communications systems. This course provides an overview of the final step in the Critical Infrastructure Protection Process as outlined by the U.S. Fire Administration. Based on ODP guidelines.
