Tested	SHOW TITLE	SHOW #	LENGTH	SYNOPSIS
A+	Active Shooter	111-0909	30 minute video plus course materials	When an active shooter is on the loose in your home town, do you know what to do? Incidents involving active shooters have become all too familiar, and law enforcement officers need to know what to do to stop the killing. This course examines what steps officers should take and how police departments can effectively respond to an active shooter.
A+	Confined Area Survival Tactics, Part 1	176-2167	30 minute video plus course materials	Phil Messina of Modern Warrior presents a program in confined area safety/survival tactics (CAST) that literally teaches how to win a fight in a phone booth. In this first installment, Messina presents the science of influencing physical motion and high-risk physio-kinetics.
A+	Critical Incident Stress Management	888-0228	30 minute video plus course materials	LETN begins its look at critical incident stress management (CISM) by examining this comprehensive, integrated, multi-component crisis intervention system. CISM consists of a set of core interventions useful for public safety applications. Join this series and explore pre-crisis planning and education and intervention methods.
A+	The Sullivan Case: Violent Abuse of a Child	179-0177	30 minute video plus course materials	Investigators were called to a scene where a child had fallen down stairs. But what the New York State Police found was much more disturbing. What was revealed as they began questioning those present will stay in their minds of the investigators for the rest of their lives. LETN takes a look back at this case.
A+	The Proper Use of Trajectory Rods	160-0003	30 minute video plus course materials	Trajectory rods are useful for the determination of bullet trajectories in the reconstruction of shooting incidents. It is important to know and understand the special techniques associated with trajectory rod usage. This course describes these techniques and discusses their application.
A+	Medical Detectives: Fatal Fall	184-0127	30 minute video plus course materials	When Janice Johnson was found lying in a pool of blood at the foot of her basement stairs, the tragedy was ruled an accident—until circumstantial evidence caused the case to be reopened, leading to the imprisonment of her husband for murder. In this course, attorney James Lockyer of the Association for the Defense of the Wrongfully Convicted calls in pathologists who postulate that Janice did accidentally fall down the stairs.
A+	Tactical Communication, Part 3	179-0170	30 minute video plus course materials	This course, the final installment of the Tactical Communication series, discusses anxiety reduction and the important strategy of approach to contact. Designed for instructors, this segment provides the “take-away” information participants need to enhance communication with others
A+	Tactical Patrol: Vehicle Search, Part 2	163-0007	30 minute video plus course materials	This course is the second of a two-part series on vehicle searches. Part one focused on three types of vehicle searches: frisk, search incident to arrest, and consent. In part two, we cover other types of vehicle searches, including plain-view seizures, motor vehicle inventory searches, and other vehicle searches (e.g., searches of vehicles involved in accidents and searches of vehicles that have been abandoned).
A+	WMD—What Every Officer Should Know, Part 4: Chemical Weapons	162-0013	30 minute video plus course materials	This course provides law enforcement officers with an overview of chemical weapons. After a brief historical summary, a description is provided of the four common categories of chemical weapons, routes of exposure, symptoms of exposure, possible long-term health effects, and actions to take if exposure to these agents occurs.
A+	Violent Offender Analysis, Part 5: Know Your Enemy	179-0122	30 minute video plus course materials	What you find at the scene of a violent crime will tell you a lot about the person who committed the crime. To know your enemy, you must study what your enemy does. In fact, FBI SSA Alan Brantley says offenders often leave messages for the investigator.
A+	Crime Prevention	185-0123	30 minute video plus course materials	We all use signals from people who cannot speak, such as infants or people who are ill or injured. Too often, we forget about or ignore these same signs when we deal with people who can speak. To fully understand what is taking place in front of us, we need to comprehend the total dialogue being presented, not just the words being spoken. This course will help you understand and evaluate nonverbal messages.
